solution

Dear Ladies
and Gentlemen

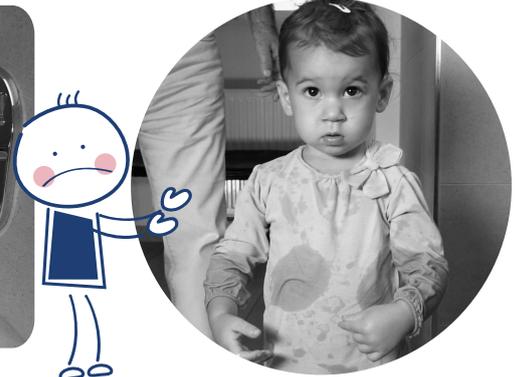

We would like to inform you about our family friendly innovative step device from Austria. Equality and hygienic safety are values that characterize our company. Our patented step device “Kiddy Step Pro”, not yet available in the EU, is a problem solution for the public sanitary area, especially for children, their companions and people of short stature. We were inspired by,

- The **equality law**, in which the following formulation can be found: **Barrier-free** means that all areas of human life can be found, accessed and used by everyone, **regardless of disabilities and in principle without outside help**. In the Federal Constitution there is also a clearly anchored commitment to the equality of people with and without disabilities in all areas of social life.
- from the **“clean hands”** campaign of the Charité Medical University of Berlin, a campaign to improve hand disinfection in health facilities / **safety**. Clean hands avoid the transmission of pathogens and the associated risk of infection. A challenge that currently affects our entire society.

problem

In order to wash the hands of small children, the accompanying persons must lift the child to the sink and hold it up, and also wash both of the child's hands with one hand. The posture is very uncomfortable for both the child and the adult, and the clothes and body get wet in the most contaminated object in the public lavatory . If there are several children to look after, this often restricts the accompanying person's attention.

This type of hand washing does NOT ensure correct accessibility and hygienic in a public lavatory.

functional

The step device, Kiddy Step Pro, is a complete EU product and has been extensively tested for functionality and safety by TÜV Austria and confirmed by a certificate, so your company is protected.

The KSP is firmly attached to the floor under the washbasin with anchor bolts.

When not in use, the step surface is aligned vertically by means of a gas suspension.

As soon as a child wants to use the sink, e.g. To wash his hands, he or she presses the step / platform down with one foot into a horizontal position and stands with both legs on it. Due to the weight of the child, the step surface / platform remains horizontal. After leaving the platform, it will automatically slowly stand up slowly again.

As a professional company, you certainly understand the difficulties that parents have with their children when using inappropriate sanitary facilities. Especially in the currently very challenging times that require increased hand hygiene, it is more important than ever to be able to guarantee this in your company.

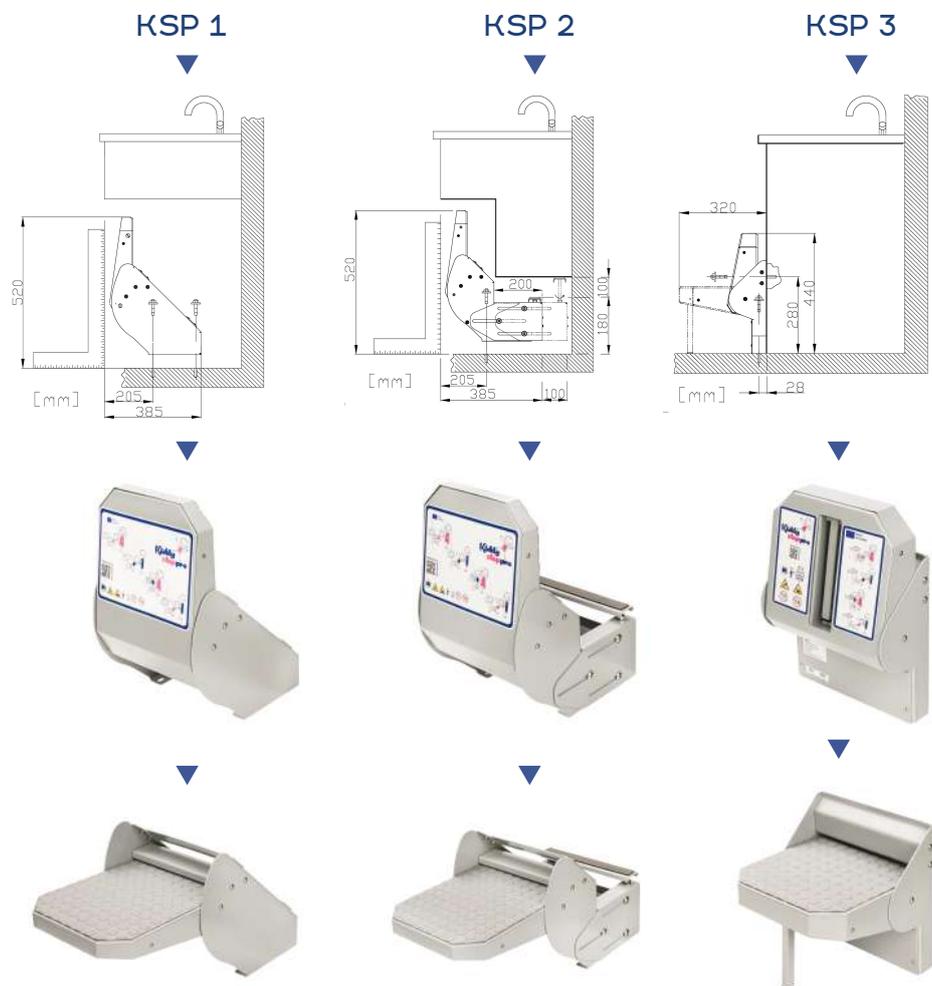

Your advantages of Kiddy Step Pro:

- **Family-friendly facility:** with the Kiddy Step Pro you are sending out an important signal that your establishment is a hygienic, comfortable, family-friendly and modern company.
- **Cost reduction & environmentally friendly:** Considerable savings in cleaning time and cleaning agents.
- **Cleaning:** cleaning staff can easily clean the step support and the floor area. The sink and floor remains dry. Less soiling and the risk of slipping. This enables a much cleaner sanitary area.
- **Installation:** Low cost and time reduction by avoiding an alternatively complex conversion for a child-friendly washing facility. Quick and easy assembly within only 30 minutes.
- **High product quality:** Made in EU. To ensure a long service life and easy cleaning, the product is made of corrosion-resistant stainless steel and is powder-coated.

- **Liability & certification:** All three Kiddy Step Pro designs have been extensively tested by TÜV Austria for functionality and safety and confirmed by a certificate, so your company is protected.

Our three designs, adapted to different sanitary facilities.

Your KSP can be produced in various powdered coating colours.

Would you like one or more of the three versions of the Kiddy Step Pro for your company? Then we would like to congratulate you on the exemplary important step in the right direction, towards a hygienic, family-friendly and modern company. We look forward to hearing from you and placing your order.
